Ofstead & Associates

Cori Ofstead, MSPH, President and CEO

Ms. Ofstead is an Epidemiologist with 25 years of research experience. As the company founder and CEO, she oversees a multidisciplinary team that designs studies, conducts real-world outcomes research, and provides insights about improving the quality of healthcare.

Evan Doyle, BS, Research Associate

Mr. Doyle joined Ofstead as a Research Associate in 2013. He earned a Bachelor of Science degree in Health Sciences from the University of Minnesota Rochester with research experience in public health, public policy, and international health. He supports the research team in identifying, compiling, and organizing the scientific literature, and performing studies on the quality and outcomes of healthcare.

From Research to Results

Since 1996, Ofstead has focused exclusively on providing customized research services for clients in the medical field. They have collaborated with healthcare providers, professional associations, research institutions, pharmaceutical companies, medical device manufacturers, and medical software companies nationwide.

Ofstead’s unique team of multi-disciplinary medical professionals and healthcare industry experts comprises:

- Biostatisticians
- Clinicians
- Epidemiologists
- Health Policy Analysts
- Information Science Specialists
- Medical Writers
- Public Health Educators
- Survey Methodologists

We approach literature searches and data analysis like detective work. We’re great writers and educators, and we know medical.
