

UMR Student' Barriers, Emotions, & Desires of Campus Sexual Health Resources

ROCHESTER

Rachael Ojeikhodion, Angie Mejia PhD, Rachel Olson MSc, PhD
Center for Learning Innovation, University of Minnesota Rochester

Are contraceptive products available on UMR's campus?

Do you feel comfortable buying contraceptive products?

How does UMR provide access to sexual education?

Does UMR provide a safe and supportive environment?

How does UMR provide access to sexual health services?

What services do/would you use at UMR?

Factors contributing to lack of contraceptive use

How does UMR provide access to onsite resources of contraceptives that do not require a prescription?

Background & Methods

To elucidate UMR student' barriers, emotions and desires of sexual health resources an 11 likert-scale question survey was administered.
 ** IRB approval was obtained, sample size = 95
 * Data analyzed according:
 total data (left): pie charts depicting proportion
 gender (middle): stacked bar chart, x-axis = number of participants
 Ethnicity (right): stacked bar chart, x-axis = number of participants

Results & Discussion

Despite UMR providing condoms on campus it is clear that; UMR students are uncertain about sexual education, services, as well as onsite resources to contraceptives. Due to the lack of awareness, and product diversity, steps have been taken to access this problem.
 - Implementing a system where students are able to access contraceptives products on campus.
